Read chapter Summary: The blowout of the Macondo well on April 20, 2010, led to enormous consequences for the individuals involved in the drilling operati...

Summary - The National Academies Press

3. Blowout Preventer System. If hydrocarbons unexpectedly flow into the well during drilling or other operations despite the use of primary barriers in the well, the blowout preventer (BOP) system serves as a secondary means of well control (i.e., preventing undesired hydrocarbon flow from the well).

Geotechnical / Civil Engineering Jobs - Earthworks-jobs.com

Fabrication is the process used to manufacture steelwork components that will, when assembled and joined, form a complete frame. The frame generally uses readily available standard sections that are purchased from the steelmaker or steel stockholder, together with such items as protective coatings and bolts from other specialist suppliers.

Fabrication - SteelConstruction.info

A drilling rig is used to create a borehole or well (also called a wellbore) in the earth's sub-surface, for example in order to extract natural resources such as gas or oil.

Measurement while drilling - Wikipedia

Home. Temperature Measurements in Boreholes: An Overview of Engineering and Scientific Applications. Stephen Prenskey, U.S. Geological Survey, Denver

Temperature Measurements in Boreholes:

The complexity of the oil and gas industry offers a wide variety of opportunities for career development to petroleum engineers. In most oil companies worldwide the petroleum engineering team consists of a geologist, a reservoir engineer, a petro-physicist, a drilling engineer and a production engineer.

Petroleum Engineering - MSc | London South Bank University

(l) Upon completion of the drilling operations at a well, the operator shall install and utilize equipment, such as a shut-off valve of sufficient rating to contain anticipated pressure, lubricator or similar device, as may be necessary to enable the well to be effectively shut-in while logging and servicing the well and after completion of the ...

Pennsylvania Code

Spacing and target areas for oil wells. 6 (1) In each pool, the target area for an oil well in a normal spacing area at any depth is the area inside, but not nearer than 100 m to the sides of, the spacing area.

Drilling and Production Regulation - Laws Publications

The American Association of Petroleum Geologists is an international organization with over 38,000 members in 100-plus countries. The purposes of this Association are to advance the science of geology.
