

Today Physical Science Control Test

What is science? Science is the concerted human effort to understand, or to understand better, the history of the natural world and how the natural world works, with observable physical evidence as the basis of that understanding 1.

What is Science? - University of Georgia

Science is a systematic and logical approach to discovering how things in the universe work. It is also the body of knowledge accumulated through the discoveries about all the things in the universe.

Science & the Scientific Method: A Definition

Publisher of books, continuing education courses and journals for Fitness, Exercise, Coaching and Sport

Human Kinetics - Physical Activity and Health Publisher

An experiment is a procedure carried out to support, refute, or validate a hypothesis. Experiments provide insight into cause-and-effect by demonstrating what outcome occurs when a particular factor is manipulated.

Experiment - Wikipedia
